
1. ENTERPRISE TECHNOLOGY STRATEGY

The organization has adopted a Microsoft-first technology strategy.

All newly developed enterprise applications should prioritize Microsoft technologies and Azure cloud services whenever technically feasible.

The organization currently maintains enterprise agreements with Microsoft, including Azure, Microsoft 365, Power BI, Microsoft Entra ID, and Azure OpenAI services.

Strategic Objectives:

- Reduce operational complexity
- Standardize enterprise platforms
- Improve security governance
- Improve integration consistency
- Reduce vendor fragmentation

Preferred Cloud Platform:

- Microsoft Azure

Restricted Platforms:

- AWS (requires executive approval)
- Google Cloud Production Workloads

2. ENTERPRISE APPLICATION STANDARDS

All enterprise applications must follow:

- Cloud-first architecture
- API-first design
- Secure-by-default implementation
- Containerized deployment strategy
- Enterprise monitoring standards

Applications should be designed to support future international expansion and multi-region deployment.

Preferred Deployment Model:

- Docker Containers
- Azure Container Apps
- Azure Kubernetes Service (AKS)

3. IDENTITY & ACCESS MANAGEMENT

Mandatory Identity Provider:

Microsoft Entra ID

Requirements:

- Single Sign-On (SSO)
- Multi-Factor Authentication (MFA)
- Role-Based Access Control (RBAC)
- Centralized User Management
- Enterprise Audit Logging

Local username/password authentication should not be developed unless explicitly approved.

4. RECRUITMENT SYSTEM INTEGRATION STANDARDS

Mandatory Integrations:

1. Workday
2. Microsoft Teams
3. Outlook Calendar
4. Microsoft Entra ID

Recommended Integrations:

1. LinkedIn Talent Solutions

2. Indeed
3. Glassdoor
4. HackerRank
5. Codility

Integration Guidelines:

- REST APIs preferred
- Event-driven integrations encouraged
- Direct database access discouraged

5. DATA MANAGEMENT STANDARDS

Preferred Databases:

Primary:

- Azure SQL Database

Secondary:

- PostgreSQL

Document Storage:

- Azure Blob Storage

Data Retention Policy:

Candidate Records:

7 Years

Interview Records:

5 Years

Audit Logs:

10 Years

Analytics Data:

Indefinite Retention

6. SECURITY & COMPLIANCE STANDARDS

Mandatory Controls:

- Encryption at Rest
- Encryption in Transit
- Detailed Audit Logging
- Activity Monitoring
- Security Event Tracking
- Data Classification
- Access Reviews

Compliance Requirements:

- GDPR
- ISO 27001
- SOC 2

Security Reviews:

All production deployments must pass security review before release.

7. REPORTING & ANALYTICS STANDARDS

Approved Analytics Platform:

Power BI

Required Executive Dashboards:

- Hiring Funnel Analysis
- Time-to-Hire
- Time-to-Fill

- Recruiter Productivity
- Hiring Cost Analysis
- Diversity Hiring Metrics
- Regional Hiring Performance
- Candidate Satisfaction

Reporting Refresh Frequency:

- Operational Dashboards: Near Real-Time
- Executive Dashboards: Daily
- Strategic Reports: Weekly

8. AI GOVERNANCE GUIDELINES

Approved AI Platforms:

- Azure OpenAI
- Azure AI Foundry

Potential Approved AI Use Cases:

- Resume Parsing
- Candidate Matching
- Candidate Ranking
- Job Description Generation
- Interview Question Generation
- Recruiter Assistance
- Talent Gap Analysis

Restricted AI Use Cases:

- Fully Automated Hiring Decisions
- Candidate Rejection Without Human Review

Human review must remain part of the hiring process.

9. NON-FUNCTIONAL REQUIREMENTS

Availability:

- Minimum 99.9% uptime

Performance:

- Candidate Search < 2 Seconds
- Resume Processing < 10 Seconds
- Dashboard Load < 5 Seconds

Scalability:

Current Scale:

- 28,000 Employees
- 150,000 Applications Per Year

Target Scale:

- 50,000 Employees
- 500,000 Applications Per Year

10. DEVOPS & RELEASE MANAGEMENT

Approved Source Control:

- GitHub Enterprise

Approved CI/CD Platform:

- GitHub Actions

Required Pipeline Stages:

1. Code Validation
2. Automated Testing
3. Security Scanning

4. Build Validation
 5. Deployment Approval
 6. Production Deployment
-

11. OBSERVABILITY & MONITORING

Required Monitoring Capabilities:

- Application Monitoring
- Infrastructure Monitoring
- API Monitoring
- User Activity Monitoring
- Error Tracking
- Security Monitoring

Preferred Tools:

- Azure Monitor
 - Application Insights
 - Log Analytics
-

12. FUTURE DIGITAL TRANSFORMATION ROADMAP

Phase 2:

- AI Candidate Matching
- AI Candidate Ranking
- AI Interview Assistant
- Automated Candidate Communication

Phase 3:

- Workforce Planning
- Talent Forecasting
- Attrition Prediction

- Hiring Demand Forecasting

Strategic Goal:

Create a unified global talent acquisition platform capable of supporting future AI-driven recruitment operations while maintaining compliance, security, scalability, and governance standards.
